

AMALFI

Solar and glare control

Thanks to their manufacturing process, solar screen fabrics provide a woven textile appearance with dissipation of solar energy, discrete transparency, and fresh air passage. Amalfi frames are available in white and brown powder coated finish.

Simple in its design and effective in blocking UV rays while reducing indoor heat and glare, Amalfi is the perfect and simplest solution to exterior rolling-shade needs.

Offered with colorful acrylic fabrics or screen mesh, Amalfi helps to eliminate up to 80% of undesired sun glare and helps to reduce air conditioning costs up to 20%.

Optional cassette
